TECHNOLOGIES

ASPEN • DENVER • PALM BEACH • VAIL

Simple, reliable technology

For over a decade, Decypher Technologies has enhanced people's lives at home and at work with simple, reliable IT solutions. With a focus on continued education, experience and client service, we are the premier IT networking and communications provider in the Rocky Mountains and beyond.

Our team of Apple, Microsoft, Cisco and VMware-certified technicians takes the complexity out of your technology and provides the solutions you need. Decypher also offers round-the-clock service and support to keep your systems working the way they should.

Whether you're running a business or managing your home, we help you make the most of the technology you already have and ensure you have the right solutions for the future, providing quality equipment and expert service.

Let Decypher give you the peace of mind that comes with knowing your technology *just works*.

CELLULAR

Our cellular services enable our clients nationwide to enjoy cellular coverage in the comfort of their home or office where none was previously available. The possibilities go far beyond home and work—yachts, hotels, and campus environments also benefit greatly from our cellular solutions.

We're proud to offer our customers distributed antenna systems (DAS)—the best solution for improving cellular and radio coverage in buildings and for boosting cellular coverage where cell signal is weak or nonexistent.

Do you constantly drop important calls where you need to be connected most? Learn how we can help you make the most of your cellular coverage—call us today.

WIRELESS

Your wireless network is the hidden workhorse of your home and business. It's also the foundation of a connected experience—absolutely essential—so it has to keep working at peak efficiency.

We take wireless to the next level with our Spectrum Analysis, pinpointing problem areas and interference so you stay connected all the time. Our enterprise-grade wireless network solutions provide fast, reliable and highly secure coverage that you can count on.

Talk to us today to tune up the performance of your wireless network.

"The Sebastian, Vail, had an immediate need for an IT specialist to assess the health, security and overall structure of our networks. Decypher Technologies was able to react quickly and provided us with the information and solutions we needed to move forward in the most efficient manner. They were a pleasure to work with and gave us the peace of mind that only comes from working with true professionals."

Lance Thompson

Director of Resort Operations, Timbers Resorts

MANAGED SERVICES

We view IT support as a partnership with you, and as your partner we want to provide comprehensive support for all of your technology needs—all for one flat monthly fee. We'll give your system the regular attention it deserves to keep it safe from threats and running smoothly.

Your technology is critical to your organization. Our managed services can help ensure that your technology assets are fully available and performing optimally at all times, leaving you to focus on what's important.

Talk to us today about how we can bundle the services you need into one package.

FIBER

Harness the power and reliability of a network built on fiber. Fiber optic cables mean faster speeds, greater distance covered and an internet connection you can count on. Even in the farthest nooks and crannies of your commercial or residential property, fiber makes networks and wireless ultra-dependable.

A fiber network also has the capacity to handle enormous amounts of data, ensuring that you aren't left behind as internet speeds increase. With Master Fiber Optic Technicians and state-of-the-art fiber splicing equipment, we are among the most experienced fiber optics engineers and installers in the Rocky Mountain region.

Do you want to future proof your network? Talk to us today about a free fiber consultation.

A range of other IT services

From computers, tablets and mobile devices to surveillance systems, unified communications solutions, VoIP phones and cloud-based services, Decypher Technologies can be your *total technology provider*.

Let's discuss how we can help address all of your IT needs—and make the most of your technology investment. **Get in touch with us today.**
